

ENERGY STAR

(www.energystar.gov)

The Environmental Protection Agency (EPA) has launched a national campaign called ENERGY STAR to teach and encourage Americans to help protect the environment and reduce energy consumption by changing to energy efficient product practices. Energy efficiency is important to our country. It can help preserve our natural resources, reduce foreign oil imports, save billions of dollars, clean our air and protect our planet for generations. The EPA's message is an easy one. Look to make an ENERGY STAR change. By using ENERGY STAR to increase energy efficiency at home and at work, each of us can make an enormous difference now and for the future.

The ENERGY STAR website can be viewed at www.energystar.gov. On this site you will find information such as: what products carry the ENERGY STAR label; how to improve your home; how to buy a new ENERGY STAR qualified home; where to buy products and much more.

ENERGY STAR Specifications:	Minimum CFMs/Watt	Maximum Sones	Minimum Warranty
Bath fans up to 75 CFM	1.4	2.0	3 years
Bath fans 76 CFM and over	2.8	1.5	3 years

Panasonic ventilation fans may qualify for an energy saving rebate. Rebate programs are often provided by local utility companies and based on ENERGY STAR guidelines. Check with your local utility company for details.

Panasonic bath fans exceed ENERGY STAR Specifications:				
	CFMs	CFMs/Watt	Sones	Warranty
WhisperCeiling: Ceiling Mount Vent Fan				
FV-06VQ2	60	4.3	<0.3	3 years
FV-07VQ2	70	3.7	0.3	3 years
FV-08VQ2	90	4.3	0.7	3 years
FV-11VQ2	110	4.1	1.5	3 years
FV-11VQD2	110 / 60	4.1 / 3.3	1.5 / <0.3	3 years
FV-15VQ3	150	3.6	1.5	3 years
FV-20VQ3	190	4.5	1.3	3 years
WhisperLite: Ceiling Mount Vent Fan / Light				
FV-07VQL2	70	3.7	0.3	3 years
FV-08VQL2	90	4.3	0.7	3 years
FV-11VQL2	110	4.1	1.5	3 years
WhisperWall: Through-the-Wall Vent Fan				
FV-08WQ1	70	3.9	1.1	3 years
WhisperWarm: Ceiling Mount Vent Fan / Heater				
FV-11VH1	110	4.5	1.1	3 years
FV-11VHL1	110	4.4	1.0	3 years

HOME VENTILATING INSTITUTE

(www.hvi.org)

All Panasonic ventilation fans are tested and certified by the Home Ventilating Institute (HVI). The HVI label is your assurance that the certified airflow and sound rating of Panasonic ventilator fans are the results of testing by an independent laboratory.

HVI is a non-profit association comprised of manufacturers of home ventilation products. HVI offers a variety of services including, but not limited to, test standards, certification programs for airflow, sound and energy performance. Through a Certified Rating Program, HVI provides a voluntary means for residential ventilation manufacturers to report comparable and credible product performance information based upon uniformly applied testing standards and procedures performed by independent laboratories. This program provides a fair and credible method of comparing ventilation performance of similar products. In addition, the random verification program ensures that those products still meet their original performance.

HVI certification has been accepted and recognized as the method of performance assurance by many agencies such as the US Department of Housing and Urban Development, Bonneville Power Administration, National Building Code of Canada, Washington State Building Code, Minnesota Building Code Building Officials and Code Administrators International (BOCA), International Conference of Building Officials (ICBO) and the National Electrical Manufacturers Association.

HVI activities help to promote the health and growth of home ventilation while providing consumers with valuable information and confidence in their choices.
