

# Save Water. Save Money.

with Environmental Water Systems

## Did You Know?

- Self-cleaning filtration systems last longer and filter effectively
- Systems that do not self-clean have short lives and poor filtration results (*see test results below*)
- EWS offers you control over your system's water use
- Self-clean can be turned off or on when needed
- EWS gives you flexibility other systems do not provide
- Water used during EWS self-clean is filtered and reusable

## Make the Smart Choice.

Do good for yourself, your family, your pets (and plants), and the environment.

Features	EWS	Others
Allow for full, normal flow rate and water pressure	✓ YES	✗ NO
Has the ability to automatically self-clean	✓ YES	✗ NO
Up to 10 years filter life without replacement	✓ YES	✗ NO
Self-cleaning can be adjusted for water conservation	✓ YES	✗ NO
Can self-clean to provide proper tested filtration levels*	✓ YES	✗ NO
Full control of your system to suit your needs	✓ YES	✗ NO
Adapts to changing water conditions	✓ YES	✗ NO
Provides superior water quality*	✓ YES	✗ NO

Water conservation is important. Making sure your family's water is free of contaminants is also important. EWS has the best and easiest solution for handling both concerns. You don't have to sacrifice quality and your family's health for an ineffective non-backwashing unit.
