Prevention and treatment of cancer

The mutation DNA of the cell is the reason of cancer formation.

Toxic substance can be accumulated in our body due to the free radical. For examples: insecticide of the vegetables and fruits, and the antibiotics of meat and antiseptics of food we eat etc.

So the cause of cancer is from the toxic substance accumulated inside our body. The best way to prevent cancer is to let the toxic substance to be discharge from the sweat.

Human body has the self-healing ability. Our body can produce some anticancer substances by itself. This needs both nutrition and energy. For example: egg is very nutritional but if without energy, the egg will not be hatched. If one can meditate using one's willpower to guide the anticancer substances to fight cancer, it is useful. Of course one still need the supervision of a medical doctor. Due to the poor blood circulation and oxygen supply of the cancer patient, the effort of chemotherapy and radiotherapy will all in vain therefore in order to improve the blood circulation and oxygen supply use our "Relax" FIR Sauna can finally eliminate the cancer cells and to help the patient.
